EDUCATION

Universidad Carlos III, Major: Computer Science and Engineering   **2024 exp.**
- **Coursework:** Databases, Computer Structure, Computer Networking, Statistics, UI/UX, Discrete Math, Software Development, AI, Calculus, Data Structures and Algorithms.

EXPERIENCE

Frontend Engineer, Stylib | London, UK (remote)   **May 2022 — Present**
- Regularly collaborate with cross-functional teams to transform design wireframes into functional interfaces, achieving an average of 15+ successful implementations per month.
- Conduct testing to ensure top performance, cutting down state management bugs, and create clear component documentation, making it easier and quicker to develop new features for the team.
- Engineered a robust "Like" feature from backend to frontend, including database integration and Python API development, resulting in a boost in daily user interactions.

Skills: Javascript, TypeScript, React, NextJS, Redux, Storybook, CSS, HTML, Tailwind, Jest, Cypress, DynamoDB.

Frontend Engineer, Qreuz | Berlin, Germany (remote)   **Sep 2021 — May 2022**
- Developed interactive UI interfaces across a variety of different use cases, enhancing web application functionality and user engagement.
- Documented development processes and coding standards, enhancing code maintainability and easing debugging.

Skills: Javascript, React, Context API, styled-components, Material UI, CSS, HTML, AWS, Bitbucket.

Frontend Developer, Freelance | Madrid, Spain (remote)   **March 2020 — Sep 2021**
- Accumulated over 200+ hours of professional frontend development work, including building a landing page for an Australian farm marketplace and a responsive page for a Chinese ecommerce builder, showcasing my extensive practical experience and understanding of diverse client needs.
- Achieved a perfect 5/5 stars rating across 15+ projects and earned high praise for professionalism, intelligence, and quality of work, solidifying my reputation as one of the best freelancers in the field.

Skills: HTML, CSS, Javascript, Typescript, React, Redux, Wordpress.

IT Support Technician, Vanrays | Madrid, Spain   **Oct 2019 — Sep 2021**
- Led IT project for the company's internal booking channel manager, supervising +5 freelancers and handling critical technical elements including user experience and functional requirements.
- Developed the WordPress website, using Elementor and a variety of plugins, improving the user interface and experience, attracting and engaging over 100 weekly visitors and registered users.
- Wrote script for automatic check-in/check-out date integration, improving booking management for the entire administrative team, leading to a smoother and more efficient booking experience.
- Implemented an automation process for generating rental contracts, substantially reducing manual effort and enhancing efficiency for all future contract handling.

Skills: GCP, AWS, Scripting, Jira, Wordpress, Elementor, Javascript.
