EXPERIENCE

Software Engineer, MyTraffic | Madrid, Spain (remote) **June 2026 — Present**

- Building Gini, MyTraffic's geospatial AI product for location intelligence and site selection, using LLMs, React, Python (FastAPI), and PostgreSQL/PostGIS, BigQuery

Software Engineer, Stylib | Madrid, Spain (remote) **May 2022 — April 2026**

- Built a visual search widget that lets users upload a photo and get matched to real architectural products, handling the full frontend integration (React, TypeScript, Context API)
- Created a multi-agent semantic search system that turns natural language into structured product queries, using an Entity–Filter–Validator pipeline to make finding architectural materials actually work (Python, FastAPI, LLMs, Pydantic AI)
- Architected Stylib HUB, a catalog management platform that lets suppliers consolidate and distribute product data across channels while keeping every catalog accurate (React, TypeScript, Redux, PostgreSQL, AWS)
- Built an interactive product showcase that makes complex design specifications effortless to browse, with a focus on performance (React, TypeScript, Tailwind, Zustand)

Web Developer, Freelance | Madrid, Spain (remote) **March 2020 — May 2022**

- Delivered 15+ web applications with REST API integrations, focusing on data flow, validation, and error handling across client-server interactions
- Built React/TypeScript applications with structured state management and production-ready architecture
- Developed backend integrations using Node.js and Express for API handling and server-side logic
- Maintained 5/5 client rating for code quality, reliability, and communication

IT Technician (Systems & Automation), Vanrays | Madrid, Spain **Oct 2019 — Sep 2021**

- Led development of an internal booking system, coordinating 3+ freelancers and contributing to frontend and backend implementation using React and Node.js
- Automated booking and contract workflows, reducing manual effort by 80% and improving operational efficiency
- Improved system reliability through data handling and process automation solutions

EDUCATION

BSc Computer Science and Engineering, Universidad Carlos III de Madrid **July 2026**

- **Coursework**: Data Structures & Algorithms, Databases (SQL/NoSQL), Machine Learning, Distributed Systems, Computer Networks, Discrete Math, Computer Architecture, Cybersecurity.
- **Bachelor Thesis**: Multi-Agent AI System: Designed an end-to-end pipeline for semantic search using NLP and structured filtering

SKILLS

- **Backend & Systems**: Node.js, Express, Python, FastAPI, SQL, NoSQL (DynamoDB), AWS, Linux
- **Engineering**: Testing (Jest, Cypress, pytest), CI/CD (GitHub Actions), Git, Agile
- **Frontend**: React, Next.js, TypeScript, Redux, Tailwind, Storybook
- **Languages**: Spanish (Native), English (Fluent)
